

**Cully Energy Plan PAC Meeting #1**  
**Meeting Objectives and Agenda**  
**February 27<sup>th</sup> 2017**

**Meeting Objectives:**

- Have PAC members meet
- Review overall Energy Plan objectives, plan development, timeline and PAC role
- Hold PAC discussion and brainstorm:
  - Best approach for plan development
  - What baseline data to gather and how to gather information

**Meeting Agenda:**

A.	Welcome
B.	Introductions
C.	Review: Cully Energy Plan Project, PAC Role, Timeline
D.	PAC Discussion and brainstorm: <ul style="list-style-type: none"><li>• Explore Cully Energy Plan Approach</li><li>• Baseline Data</li></ul>
F.	Next Steps & Closing

# Cully Energy Plan PAC Meeting #1

## Meeting Notes

### February 27<sup>th</sup> 2017

Present: Eron, Jaimes, Derek, Andria, Desiree, Taren, Lizzie, Khanh, Alan

#### Introductions

#### Questions: What are you passionate about in your work? Why did you decide to participate on PAC?

Eron: "Participated in the first energy plan." Likes working closely with people in the community

Jaimes: "Abstract" – is usually working on abstract ideas/projects. Nice to work on something more concrete related to energy and community.

Derek: Excited to work on the intersection of climate change and social justice work

Andria: Happy to be representing government and how local government can help

Desiree: embedding social justice in government. Passionate about Verde

Taren: the work that NRI does is very inspiring. Wants to explore NRI move into more energy focused work

Lizzie: "working with people". ETO itself is looking to be more equity focused  
"excited to be on the ground"

Khanh: "movement building" inspired by the energy plan. "jade district"

Future meetings will be set:

March: 3<sup>rd</sup> Monday of the month 3-5pm

Rest of the year: 4<sup>th</sup> Monday of the month 3-5pm

#### Comments/Questions from Energy Plan overview:

- This seems like an aggressive timeline
- Prioritize? (*missed the prioritize what?*)
- Where is the community engagement in this process?
- Are stakeholders identified yet?
- Technical Assistance—what funds are available?

#### Comments/Questions from Approach and Baseline question:

- Matrix
  - Owner vs. renter information
  - Where is the greatest opportunity
- Goals: How to serve renters
- What are the priorities?
  - Having Zero Net Energy Goal for the neighborhood at the larger level or
  - Working to help with the greatest burden?
- Challenges with the weatherization work in Cully, many homes need critical repairs (example new roof) before weatherization can be done

- Is meeting community where they are at, listening to their priorities, having a “we need roofs” campaign as an example
- Energy goals vs. needs of the community
- What would be the true baseline?
- ETO can do analysis around residential usage
- Local utility: Is there an opportunity to develop microgrids in the neighborhood, help people reduce bills
- The energy plan would have a diversity of mixed solutions
- Can we develop a cost benefit analysis of different options? How do you decide what projects/programs you decide to move forward? Is there a way to calibrate different options, putting a dollar value
- Translate people’s need to monetary value
- New roofs and knob and tube wiring replacement is what a lot of the cully homes need
- Workforce development
  - Creating jobs with roofing
  - Need more and better sustained jobs
  - Actually there are different types of economies, and even short term jobs can help out some of our households
- What is the vision of the energy plan? If you have success, what will have changed?
  - More jobs in Cully
  - Implement the co-benefits of the energy sector with the needs of the community, tap into the opportunities and bring them to the community
- What about the educational component? For example having the plan identify Community energy workers
- Have the plan be commercial sector focused, biggest impact
- What about the anti-displacement goal in the energy plan?
- Using EE and renewables to increase the stock of low-income housing
  - Isn’t that what current EE programs are doing?
- Recommend developing a criteria for the plan
  - Reduce energy
  - Economic potential
  - Will this keep people in place
  - Is it scalable
  - Community empowerment
  - And evaluate this criteria

**Next Steps:**

- Send out calendar invites
- Send out Living Cully goals
